KEYWORD SUBJECT INDEX

User performance and preference for alphabetic entry from **10-key** pads: where to put Q and Z? 93 37 0225
Product development research for the **1990s** 93 37 0422
Guided Search **2.0**: the upgrade 93 37 1295
Comparison of eight color and gray scales for displaying continuous **2D** data 93 37 1330
Design and evaluation of helmet systems using **3D** data 93 37 0064
inputs: isometric and elastic rate control for manipulation in **3D** environments Investigation of feel for 6 DOF 93 37 0323
and continuous cursor controllers to designate targets in **3D** space The use of aiding techniques 93 37 0011
effectiveness The **ability** of two lay groups to judge product warning 93 37 0989
for young and old adults **Ability-performance** relationships in memory skill tasks 93 37 0167
Assessing driver **acceptance** of IVHS components 93 37 1062
Learning on the line: human factors issues in the design and **acceptance** of networked technology in education 93 37 0215*
earth-looking photography Interface enhancements to the image **access** and management system for space shuttle 93 37 1036*
Analysis of complexity in nuclear power severe **accident** management 93 37 0377
a research program Performance enhancement and **accident** reduction in complex systems: perspectives and 93 37 0870*
A questionnaire study of **accidents** in advanced manufacturing systems 93 37 1004
Growing a style guide: macroergonomic strategies for **achieving** consistent user interface design 93 37 0882
Eye movements in search and target **acquisition** 93 37 1305
Impact of task difficulty on the **acquisition** of aircrew coordination skills 93 37 1262
activity in repetitive work Use of the **actigraph** for objective quantification of hand/wrist 93 37 0720
An approach to identifying meaningful **action** patterns in student-tutor interactions 93 37 1281
bent trunk posture Trunk muscle **activations** while resisting asymmetric loads in a laterally 93 37 0688
Active man-machine interface for advanced rotorcraft 93 37 1032*
intelligibility performance Communications headset augmentation via **active** noise cancellation: attenuation and speech 93 37 0554
assessment Some uses of "**active** viewing" in computer-aided anthropometric 93 37 0494
with the office environment by measuring constraints to work **activities** Predicting satisfaction 93 37 0489
Compliance with warnings in high-risk recreational **activities**: skiing and scuba 93 37 0945
Development of warnings resulting from forensic **activity** 93 37 0501
The effects of extravehicular **activity** (EVA) gloves on dexterity and tactility 93 37 0826
Use of the actigraph for objective quantification of hand/wrist **activity** in repetitive work 93 37 0720
coordination **Adaptation** to stress in team decision making and 93 37 1228
Aging and medication **adherence** 93 37 0187*
Measurement techniques and level of analysis of medication **adherence** behaviors across the life span 93 37 0188
Use of automated telephone reminders to increase elderly patients' **adherence** to tuberculosis medication appointments 93 37 0193
Perspective format for a primary flight display **(ADI)** and its effect on pilot spatial awareness 93 37 0088
Preferred settings in chair **adjustments** 93 37 0448
anatomy maintenance tasks (CAMT): data base feasibility study field **administration** technology demonstration Comparative 93 37 1044*
Effect of warnings in advertising on **adolescents'** perceptions of risk for alcohol consumption 93 37 0974
relationships in memory skill tasks for young and old **adults** Ability-performance 93 37 0167
Designing medication instructions for older **adults** 93 37 0197
magnitudes The performance of female young **adults** in perception of efforts of varied nature and 93 37 0793
Application of quantitative EEG analysis to workload assessment in an **advanced** aircraft simulator 93 37 0118
system Behavioral research in an **advanced** driving simulator—experiences of the VTI 93 37 0612
A questionnaire study of accidents in **advanced** manufacturing systems 93 37 1004
Active man-machine interface for **advanced** rotorcraft 93 37 1032*
research recommendations for the development of design guidelines for **advanced** traveler information systems Human factors 93 37 1067
A simulator evaluation of **advance** flagger signs 93 37 0602
alcohol consumption Effect of warnings in **advertising** on adolescents' perceptions of risk for 93 37 0974
Decision making in the **AEGIS** combat information center 93 37 1107
exercise on information-processing speed **Age** and fitness differences in the effects of posture and 93 37 0177
and menus Understanding time-compressed speech: the effects of **age** and native language on the perception of audiotext 93 37 0244
three-element viscoelastic model Modeling **age** differences in isometric elbow flexion using Hill's 93 37 0202
driving simulator **Age** differences in the useful field of view in a part-task 93 37 0960
The impact of **age** on visual search performance 93 37 0172
Aging and dual-task performance 93 37 0162
Aging and medication adherence 93 37 0187*
An examination of two ergonomically designed performance **aids** 93 37 1221

NOTE: In the numerical codes that appear in the right margin, 93 refers to the year of publication, 37 indicates the 37th Annual Meeting of the Human Factors and Ergonomics Society, and the four-digit number is the page number in the *Proceedings* on which the paper begins. Papers beginning on page 649 or above can be found in Volume 2 of the two-volume set.

* Abstract only.

A cumulative index to *Proceedings* from 1972 to 1987 is available from the Human Factors and Ergonomics Society. Contact the Society at 310/394-1811 for information.

user's information-processing strategy on the design of decision **aids** for complex systems Implications of the 93 37 0358
Job performance **aids** for the flight standards service 93 37 0026
Procedures and metrics for **aircraft** cockpit display evaluations 93 37 1201
Driving simulators: six years of hands-on experience at Hughes **Aircraft** Company 93 37 0607
An evaluation of the visual environment in **aircraft** inspection 93 37 0034
Training for decision making in **aircraft** inspection 93 37 1267
Field investigations of laser eye protection F-15E **aircraft** lighting compatibility 93 37 0055
quantitative EEG analysis to workload assessment in an advanced **aircraft** simulator Application of 93 37 0118
Impact of task difficulty on the acquisition of **aircrew** coordination skills 93 37 1262
implications Instructor strategies in the assessment of **aircrews**: heuristics in cockpit resource management 93 37 0127
personality tests and the five-factor model in landing craft **air** cushion crew training The "right stuff": 93 37 0920
Identifying information requirements for **air** traffic control problem solving 93 37 0103
A comparison of test methodologies for **air** traffic control systems 93 37 1196
pressure An explanatory model for influences of **air** traffic control task parameters on controller work 93 37 0108
Resource management in the highly automated **airspace** system 93 37 0060*
Space Station *Freedom* aural toxic **alarm** development 93 37 0052
warnings in advertising on adolescents' perceptions of risk for **alcohol** consumption Effect of 93 37 0974
neurovestibular field sobriety tests Diagnosis of **alcohol** intoxication: effectiveness of cognitive and 93 37 0964
A decision model for cognitive task **allocation** 93 37 0392
automation failures: effects of single and multiadaptive function **allocation** Monitoring 93 37 0001
Z? User performance and preference for **alphabetic** entry from 10-key pads: where to put Q and 93 37 0225
